Requirement check list for LEGO Rock Raiders Concept Testing in January.

1. A story-board of the agreed concept mounted on A1 or A2 card - <u>Don't</u> accompany this with any text.
2. Any other support material in the form of drawn artwork that is relevant to the concept mounted on card (high poly modals, creatures etc.) - <u>Don't</u> accompany this with any text.
3. A written summary of the story-line and a game description.
4. All the video footage that you have to date.

We have gone to great lengths (and expense) in preparing the concept group testing, your input to this process is of utmost importance to the success of the tests. We believe that the testing will confirm that the product is going to be a great hit with the kids, but all the feedback from these tests will be of great value to all of us. Thanks in advance for your co-operation.
